PROFILE

Detail-oriented **Data Analyst** with a B.Sc. in Computer Science and hands-on experience leveraging **Python, SQL, and Power BI** to drive business insights in fintech. Skilled in ETL pipelines, data visualization, and statistical analysis, with a proven track record of **automating reporting workflows** and building executive-level dashboards. **ALX-certified in Data Analytics and Machine Learning**, passionate about turning raw data into actionable strategies.

SKILLS

- **Languages & Querying:** Python (Pandas, NumPy, Scikit-Learn), SQL (PostgreSQL, T-SQL), Bash, Git
- **BI & Data Visualization:** Power BI (DAX, Power Query), Looker Studio, Advanced Excel, Plotly, Matplotlib
- **Analytics & Data Engineering:** ETL Pipelines, Medallion Architecture, Kimball Star Schema, EDA, Statistical Testing

PROJECTS

Credit Risk & Expected Loss Stress-Testing Engine *| PostgreSQL, Power BI, DAX, SQL, Data Modeling*

- Processed and cleaned **32,000+ loan applicant records** in PostgreSQL, executing median imputation and outlier capping on income and employment variables.
- Designed an interactive Power BI stress-testing dashboard utilizing custom DAX measures to model total Expected Loss (**EL = EAD × PD × LGD**) and built dynamic 'What-If' LGD parameters.
- Constructed demographic risk heatmaps crossing Age Bands and Loan Grades, identifying high-risk segments (**29% default concentration** in Debt Consolidation) to guide credit underwriting policies.

Retail Supply Chain Analytics *| Python, DuckDB, SQL, Power BI, DAX*

- Architected an end-to-end **Medallion Architecture (Bronze to Gold)** in DuckDB using Python, cleaning and standardizing multi-source retail data into a unified weekly exposure fact table.
- Modeled a **Kimball Star Schema** in Power BI, utilizing DAX measures (SUMX, CALCULATE) to calculate inventory movement and track low-stock risks across product categories.
- Identified a critical **47% low-stock risk in Electronics**, enabling stakeholders to optimize reordering and prevent stockouts across **56,000+ units sold**.

Marketing Analytics & Customer Sentiment Analysis *| Power BI, Python, NLP, SQL, DAX*

- Processed unstructured customer feedback and large-scale campaign metrics (**9M+ views, 1.7M+ clicks**) using Python and SQL data cleaning workflows.
- Applied **NLP sentiment analysis** to classify 1,300+ customer reviews, building dynamic Power BI visuals to track sentiment trends and campaign ROI over time.
- Identified that 'Hockey Sticks' yielded the highest conversion rate (**15.46%**), enabling marketing teams to reallocate ad spend to high-performing product lines.

Customer Churn Analysis Dashboard (Databel Case Study) | *Power BI, DAX, Power Query, Data Modeling*

- Built an interactive Power BI dashboard analyzing churn patterns for **6,687 telecom customers**, utilizing advanced DAX measures and custom drill-through pages to isolate key drivers.
- Identified month-to-month contracts had a **46.2% churn rate (7x higher than 2-year contracts)** and 44.8% of churn was driven by competitor offers.
- Quantified total revenue impact and provided a stakeholder-ready visual report with actionable recommendations for customer retention teams.

WORK EXPERIENCE

Tabby | Data & Analytics Specialist (01/2024 – Present)

- Automated weekly reporting pipelines using Python, SQL, and Power BI, eliminating manual data collection and resulting in an **80% reduction in reporting time**.
- Engineered interactive Looker Studio and Power BI dashboards tracking operational KPIs (CSAT, SLA compliance, response latency) for **32 team members**.

Tabby | Social Media Specialist / Support Representative (01/2024 – 12/2025)

- Tracked real-time engagement and resolution metrics across multiple channels, consistently exceeding a **92% CSAT benchmark**.
- Utilized social listening tools to aggregate brand sentiment data and escalate operational bottlenecks to internal teams.

EDUCATION & CERTIFICATIONS

Helwan University | Bachelor of Science in Computer Science | 2024 | Helwan, Egypt

Certifications: Data Science Certificate (ALX-2024) | Machine Learning Certificate (ALX-2024) | Data Analytics Professional Certificate (ALX-2024) | Python Programming Certificate (ALX-2024)
