PROFILE

Detail-oriented Data Analyst with a B.Sc. in Computer Science and hands-on experience leveraging Python, SQL, and Power BI to drive business insights in the fintech sector. Skilled in ETL pipelines, data visualization, and statistical analysis, with a proven track record of automating reporting workflows and building executive-level dashboards. ALX-certified in Data Analytics and Machine Learning, passionate about turning raw data into actionable strategies.

SKILLS

Languages & Querying: Python (Pandas, NumPy, Scikit-Learn), SQL (PostgreSQL, T-SQL), Bash/Git

BI & Data Visualization: Power BI (DAX, Power Query), Looker Studio, Advanced Excel, Plotly, Matplotlib

Analytics & Data Engineering: ETL Pipelines, Medallion Architecture, EDA, Statistical Testing

PROJECTS

Retail Supply Chain Analytics | Python, DuckDB, SQL, Power BI, DAX

- Architected an end-to-end Medallion Architecture (Bronze to Gold) in DuckDB using Python, cleaning and standardizing multi-source retail data into a unified weekly exposure fact table.
- Modeled a Kimball Star Schema in Power BI, utilizing DAX measures (SUMX, CALCULATE) to calculate inventory movement and track low-stock risks across product categories.
- Identified a critical 47% low-stock risk in the Electronics category, enabling supply chain stakeholders to optimize reordering and prevent stockouts across 56,000+ units sold.

Marketing Analytics & Customer Sentiment Analysis | Power BI, Python, NLP, SQL, DAX

- Processed unstructured customer feedback and large-scale campaign metrics (9M+ views, 1.7M+ clicks) using Python and SQL data cleaning workflows.
- Applied NLP sentiment analysis to classify 1,300+ customer reviews, building dynamic Power BI visuals to track sentiment trends and campaign ROI over time.
- Identified that 'Hockey Sticks' yielded the highest conversion rate (15.46%), enabling marketing teams to reallocate ad spend to high-performing product lines and channels.

Customer Churn Analysis Dashboard (Databel Case Study) | Power BI, DAX, Power Query, Data Modeling

- Built an interactive Power BI dashboard analyzing churn patterns for 6,687 telecom customers, utilizing advanced DAX measures and custom drill-through pages to isolate key drivers.
- Identified that month-to-month contracts had a 46.2% churn rate (7x higher than two-year contracts) and that 44.8% of churn was driven by competitor offers.
- Quantified total revenue impact and provided a stakeholder-ready visual report with actionable recommendations for the customer retention team to target high-risk demographics.

WORK EXPERIENCE

Tabby | Data & Analytics Specialist | 01/2024 - Present

- Automated weekly reporting pipelines using Python, SQL, and Power BI, eliminating manual data collection and resulting in an 80% reduction in reporting time.
- Engineered interactive Looker Studio and Power BI dashboards tracking operational KPIs (CSAT, SLA compliance, response latency) for 32 team members.
- Built Python scripts to extract, clean, and aggregate multi-channel social engagement datasets of over 100,000 records for quantitative performance analysis.
- Performed time-series and statistical trend analysis on customer inquiry volumes, accurately forecasting weekly demand spikes and optimizing operational capacity.

Tabby | Social Media Specialist / Support Representative | 01/2023 - 12/2023

- Tracked real-time engagement and resolution metrics across multiple channels, consistently exceeding a 92% CSAT benchmark.
- Utilized social listening tools to aggregate brand sentiment data and escalate operational bottlenecks to internal teams.

EDUCATION

Helwan University | Bachelor of Science in Computer Science | 2024 | Helwan, Egypt

CERTIFICATIONS

Data Science Certificate | ALX Africa - 2024

Machine Learning Certificate | ALX Africa - 2024

Data Analytics Professional Certificate | ALX Africa - 2024

Python Programming Certificate | ALX Africa - 2024
