# Ahmed Iprahim Abdelhamed

Cairo, Egypt • +20 102 009 4823 • ahmediprahim750@gmail.com • LinkedIn • Portfolio • GitHub

## PROFESSIONAL SUMMARY

Data & Analytics Specialist with 2+ years of experience processing high-volume operational data at Tabby (Fintech). Proven expertise in building automated ETL pipelines, writing advanced SQL queries, and designing interactive executive dashboards (Power BI, Looker Studio). Adept at transforming raw, complex datasets into actionable business insights, reducing manual reporting hours, and enabling data-driven decision-making for cross-functional teams.

## CORE TECHNICAL SKILLS

**Data Visualization & BI:** Power BI (Advanced DAX, Power Query), Looker Studio, Advanced Excel (Pivot Tables, Macros).

**Programming & Databases:** SQL (PostgreSQL, DuckDB, T-SQL, Window Functions, Complex Joins), Python (Pandas, NumPy).

**Data Engineering:** Automated ETL Pipelines, Kimball Star Schema, Dimensional Data Modeling, Data Cleaning & Validation.

**Statistical & Predictive Analytics:** Scikit-Learn, Predictive Modeling, KPI Tracking, Risk Anomaly Detection.

## PROFESSIONAL EXPERIENCE

**Tabby — Data & Analytics Specialist (Customer Operations)** Nov 2022 – Present | Cairo, Egypt

- **Reporting & Pipeline Automation:** Independently built Python scripts, Google Sheets API integrations, and Looker Studio dashboards to extract and transform operational logs, reducing team reporting turnaround by over 10 hours per week.
- **Risk & Anomaly Escalation:** Queried relational databases to identify recurring merchant and consumer delinquency patterns, escalating high-risk behavioral anomalies to Credit Risk teams for rapid intervention.
- **Payment Fraud Investigations:** Investigated suspicious customer accounts, unauthorized payment disputes, and Account Takeover (ATO) escalations directly through payment gateway consoles and internal administrative tools.

### Independent Practice — Data Analyst & BI Developer (Freelance)

2023 – Present | Remote

- **Dashboard Design & Delivery:** Spearheaded the development of executive-facing Power BI solutions, translating complex technical findings into clear visual reports for non-technical stakeholders.
- **ETL & Data Architecture:** Architected Kimball Star Schema data models and automated ETL workflows to ingest, clean, and consolidate disparate transaction datasets from multiple sources.
- **Business Intelligence Integration:** Bridged quantitative predictive algorithms with business operations by engineering dual-layer reporting systems to monitor operational health and key performance indicators (KPIs).

## KEY ANALYTICS & BUSINESS INTELLIGENCE PROJECTS

### Marketing Analytics & Customer Sentiment Dashboard

**Tech Stack:** Power BI, Python, NLP, SQL, DAX

- Processed unstructured customer feedback and large-scale campaign metrics (9M+ views, 1.7M+ clicks) using Python and SQL data cleaning workflows.
- Applied NLP sentiment analysis to classify 1,300+ customer reviews, building dynamic Power BI visuals to track sentiment trends and campaign ROI over time.
- Identified that 'Hockey Sticks' yielded the highest conversion rate (15.46%), enabling marketing teams to reallocate ad spend to high-performing product lines.

### Retail Supply Chain & Inventory Analytics

**Tech Stack:** DuckDB, Power BI, Advanced Excel

- **Inventory Optimization:** Built a high-performance analytical dashboard tracking stock turnover, inventory velocity, and low-stock risks across 56,000+ distributed units.
- **Data Modeling:** Designed optimized semantic models and dimensional hierarchies to ensure rapid query performance and accurate aggregations across massive retail operational datasets.

### Credit Portfolio Health & Risk Monitoring Dashboard

**Tech Stack:** Power BI (DAX), PostgreSQL, Python

- **Business Intelligence Layer:** Engineered an interactive Power BI reporting interface on top of predictive model outputs. Visualized delinquency buckets (30/60/90+ DPD), non-performing loans (NPLs), and portfolio-wide risk metrics to enable real-time tracking of a 32,000+ record loan portfolio.
- **Data Pipeline Integration:** Wrote optimized SQL queries and Python validation scripts to feed clean, structured predictive data (Probability of Default, Expected Loss) into the dashboard's underlying data model.

## EDUCATION & CERTIFICATIONS

### Bachelor of Science in Computer Science

Helwan University | Graduated 2024

**Certifications:** Data Analytics Professional Certificate (ALX-2024) | Data Science Certificate (ALX-2024) | Python Programming Certificate (ALX-2024).
